SUMMARY

Location: Tucumán, Argentina.

I'm a software developer focused on web applications created with technologies such as Angular, Java, Spring Boot & SQL. I have solid experience working in collaborative environments under agile methodologies, with great adaptability for new projects and teams due to fast learning skills and effective communication.

EXPERIENCE

Newfold Digital Inc.

Jul. 2024 - Present

Software Engineer

- Maintenance of a robust payment middleware system supporting multiple payment gateways, ensuring reliable and secure transaction processing for millions of users globally.

TechForb LLC

Mar. 2022 - Jul. 2024

Full-Stack Developer

- Solved production issues and made improvements in an existing **Angular + Java** application for the insurance industry.
- Utilized **Kubernetes CLI** to debug containerized services and **GitHub Actions** to streamline CI/CD workflows.
- Led the **onboarding process for new developers**, standardizing knowledge transfer and reducing ramp-up time.

SKILLS

Frontend: HTML - CSS - JavaScript - TypeScript - Angular.

Backend: Java - Spring Boot - SQL - Docker.

DevOps: AWS (EC2, CloudWatch).

LANGUAGES

English: C1 - Advanced

Spanish: Native

Education

Universidad Tecnológica Nacional

Mar. 2025 - Present

B.S. in Computer Science and Engineering (5-year degree)

- Strong foundation in **systems design, programming, database management, algorithms, and network architecture**, with practical experience in developing and managing software solutions.

Instituto Superior de Música - U.N.T

Mar. 2018 - Mar. 2023

Bachelor of Music (4-year degree)

- Skills: Group management, effective communication, pedagogy, student psychology, among others.
